

01 - BigBusinessBlueprint 7 Figure Mindset: The Big Picture

S1:

S2: Mindset 2: Identify the BIG plan.

It Is Important To Have A Plan...

Yes

BIG BUSINESS BLUEPRINT

S3: Complementing your big mindset is to have a BIG plan.

Why Is Planning So Important?

- ▶ It gives you clarity to carry out your priorities.
- ▶ Helps you decide on the important assets in your life?
- ▶ Is it your family? Money? Or relationship?
- ▶ Who do you want to **be, do, and have?**

BIG BUSINESS BLUEPRINT

S4: Having a plan is crucial as it gives you clarity to your priorities. To do this, on a piece of paper, list down everything you want to be, do and have.

Who do you want to **be**? What do you want to **do**? And what is it that you want to **have**? You may also list this down specifically for your business.

Don't think just write. Assume that money is not an issue and if you write it

down, it will be successful, so go all out for this. Pause this video, take 15 minutes and do it now.

Yes. Now!

Next, look at your full list and cross out goals that mean little to nothing to you. What I mean by that is if it doesn't excite you, move you or scare you, cross it out because it would do little to nothing to challenge you to grow.

Setting Goals With A Timeframe

- ▶ Be goal orientated –Set or customize a timetable that you can stick to it.
- ▶ Be realistic – Set only achievable goals and not superficial sky-high goals that can't be reached.

BIG BUSINESS BLUEPRINT

S5: At the end of it, you have a list of goals that truly mean something to you and these goals are completed successfully, your growth will be a quantum leap!

To bring these goals into reality, set a time frame for that goal to be accomplished. Goals and dreams that are not acted upon are just words and pictures on a piece of paper.

For example, your business goal is to grow the business by 30% by setting up 3 more branches within 9 months time. This is a measureable goal that has a quantifiable growth and a time frame for it to be achieved. It's important for

your goals to be quantifiable so you know your measurement of success.

The next part is to take massive action.

In the pursuit of taking action, you need to be mindful and self aware of your actions. Are your actions effective and efficient? Are these actions taking you closer or further away from your goal? Track your daily actions in a productivity planner.
